

BUILDINGS AND STRUCTURES MAINTENANCE

The Company

BPS building maintenance division provides planned and reactive building maintenance services to a wide range of customers throughout the UK. The company provides a 365 day, 24/7 emergency service throughout Wales, South West & M4 Corridor

Emergency Works are registered and categorized at our administration centre and allocated to our trained Operatives and monitored for satisfactory completion. Each job is recorded with regard to detail of repair or remedial works, full site & contact information.

Planned maintenance tasks are designed around the Clients detailed requirements by suitably qualified staff and in conjunction with all current health and safety regulations. Full Risk assessment and Method Statements are provided. We aim for, and achieve a high level of repeat business with our customers.

Specification Service

A full specification service is provided to enable product matching or re-specified products for existing buildings and structures. Products and materials used are evaluated for their intended application, performance and environmental impact and suitability. We source all our products from recognized and suitably registered suppliers. Our in house fabrication facilities allow us to provide rapid response for urgent and emergency maintenance situations.

Health & Safety

Health & Safety for our customers and staff is a primary concern. We are committed to ensuring our managers & staff receive suitable safety training. Risk Assessments and Method statements are produced and the company operates & complies fully in accordance with CDM Regulations HSE 2007 and amendments as necessary. We are positively engaged with our customers safety procedures and work closely to encourage and develop safe working practices.
